#### **Business Venture Consultation**

#### **Business Problem Introduction:**

I am a data scientist at a consulting firm that specializes in advising people on starting new business ventures. One of our clients is interested in opening a business in the state of Utah in the United States. Our client has heard that Utah is a very welcoming to entrepreneurs and new businesses.

Naturally, our client wants to look at the two most populous counties as potential business sites since these two counties will have the highest number of potential customers. Our client needs advice on the best type of business to open in each of counties and decide on which neighborhood in each county would be the best site to open this business.

Additionally, our firm would like to know how similar or different the neighborhoods within each county are and how the two counties compare with each other. This will enable us to help our client decide on where and what her first business venture should be.

Since I live in the suburbs of Salt Lake City, I am aware of the demographic differences between the two counties. I am personally interested in seeing how the demographic differences manifest in the location/venue data.

The two populous counties in Utah are Salt Lake County and Utah County.

https://www.utah-demographics.com/counties\_by\_population

Here's a screenshot listing Utah counties by population

2       Utah County       605,490         3       Davis County       345,767         4       Weber County       251,498         5       Washington County       165,811         6       Cache County       124,165         7       Tooele County       67,397         8       Box Elder County       53,946	2       Utah County       605,490         3       Davis County       345,767         4       Weber County       251,498         5       Washington County       165,811         6       Cache County       124,165         7       Tooele County       67,397         8       Box Elder County       53,946	Rank	County	Population

9 <u>Iron County</u> 51,213		8	Box Elder County	53,946
	10 <u>Summit County</u> 41,103	9	<u>Iron County</u>	51,213

The county seats (or the administrative centers) tend to be the most viable for starting a business. Salt Lake City and Provo are the county seats for Salt Lake and Utah County respectively.

https://en.wikipedia.org/wiki/List\_of\_counties\_in\_Utah

Salt Lake City and Provo are less than 50 miles apart and yet the demographics are quite different.

### Questions to Address:

- 1. Which county and neighborhood within that county would be best suited for starting a business venture?
- 2. What type of business would do well once we decide on a location?

## **Data Acquisition & Cleaning:**

First part of the data acquisition involves getting the names of all the neighborhoods in Salt Lake City and Provo

This information will need to webscraped using BeautifulSoup from the following webpages

https://en.wikipedia.org/wiki/List\_of\_Salt\_Lake\_City\_neighborhoods

 $\frac{https://www.provo.org/government/city-council/neighborhood-program/neighborhoods}{}$ 

The scraped data is cleaned and converted to a pandas data frame

The neighborhood, latitude and longitude data will be used with the Foursquare API to give the most common venues in each neighborhood.

The neighborhoods will be clustered using the K-Means algorithm and based on the most common venues in each neighborhood/cluster insights can be drawn as to where and what type of business venture should be started. We are looking for places where business will flourish-right location (for e.g. having restaurants in a non-residential neighborhood) and where there is not too much saturation for that particular type of business (e.g. too many coffee shops)
